Re: Confirming Our 12/19/2007 conversation about my House Complaint v. The JQC

Dear Mr. Bond:

This is to confirm our conversation, yesterday, 12/19/2007 regarding my complaint about the JQC refusing and failing to investigate my JQC complaint against several 17th Judicial Cir. and 4th DCA appellate court lawyer-Judges in collusion with several Broward assistant state lawyer-prosecutors and defense lawyer who engineered conspired and cause my fraudulent conviction and imposition of a statutorily illegal sentence and then refusing to correct it to a lawful one and release me as having exceeded any lawfully allowable sentence thereby resulting in Life felony **Kidnapping** and felony **False Imprisonment, Conspiracy and Obstruction of Justice** contrary to any law and the judicial Canons of Ethics which you know as well as I do from my complaint that they do violate several Canons and subsections of Canon 1, Canon 2, & Canon 3.

In our conversation you advised that **it is** a matter of “**Public Policy**” to allow judges to violate the law and that they **can impose any sentence they feel like regardless of the statutory requirements**, limits or controlling case law and any illegal result is not a crime, not violation of State or US Const. due process or Equal protection of law or violation of cruel and excessive punishment contrary to the legislatures statutory guidelines or Canons of Ethics that would be an impeachable offense under this “Public Policy” that you and they all swore oaths to support, so not an impeachable offense.

Thank you for the heads-up that I as a citizen, **I** can contact the Grand Jury, if the Clerk of the Court will allow me to exercise my rights to that, too and setting me straight

of **Florida Public Policy** and what I or any citizen can expect of its legislature or oversight protection if they don't feel like doing it.

Sincerely,

Lawrence Benson
